(54) Title: SYSTEM FOR PREVENTING LAPTOP LOSS

(57) Abstract: The invention is useful in preventing loss of laptops. Manufacturers are issued with codes to brand the laptops with. After branding them the unique code, zll can recognize this code anywhere where the accompanying software is used to san the product. The scan logs are maintained and checked against user details to confirm that a user owns the device. A mismatch in identity can be detected and the laptop returned to the owner. The system can also verify whether the laptop is stolen during purchase. Manufacturers can also track down the usage of their brands and the areas they need to reach out to and market.
